PROJECTS

Smart Campus AI Interview System

- Built an AI-powered mock interview platform using Python and NLP to generate role-based questions from job descriptions and evaluate candidate responses in real time.
- Integrated speech-to-text pipelines and a scoring dashboard to deliver feedback on clarity, accuracy, and confidence across multiple practice sessions.

AI Study Assistant – LLM-Powered Q&A and Summarization Tool

- Developed a RAG-based study assistant using LangChain, OpenAI API, and FAISS vector search to answer questions from uploaded lecture notes and PDFs.
- Built a summarization module condensing study material into topic-wise bullet points, with an HTML/CSS web interface for real-time student interaction.

Excel Analytics Dashboard

- Designed interactive dashboards and pivot charts in Microsoft Excel for data reporting and business insights visualization.
